TOGETHER WE CREATE
SMART AND SOUND
WORKPLACES OF THE FUTURE

Today, most of us all know the correlation between a variable working posture and a healthy work environment and the traditional ways of working are facing great challenges. The next generation sit/stand workstations from EFG offer a complete, flexible solution for any modern office. The table is stable, quiet and set to work with new, intelligent technology creating the best possible conditions for achieving a functional work environment.

Our selection of practical, sound-absorbent EFG Tab desk screens add peace and quiet as well as integrity to the workplace. EFG Add is our latest release; a collection of smart accessories developed to create an efficient, personal and welcoming atmosphere. The office of the future is about balancing productivity and well-being. Together we create smart and sound solutions for your workplace.

EFG Design Team
EFG WORKSTATIONS

SAY HELLO TO A SMARTER WAY OF WORKING

In this day and age, a flexible interior solution goes way beyond offering a practical and pretty design to the office. It must also contribute to a healthier work environment as we're becoming more aware of the benefits from working standing up. A first step forward is to invest in a flexible sit/stand table fitted with new technique that monitors who is using the table. This is particularly important at activity based workplaces with shared workstations.

A FUTURE PROOF TABLE THAT KNOWS YOU BETTER THAN YOU DO

The work table EFG Active is fitted with the very latest technology where intuitive functions offer integrated solutions based on two primary needs – a sound work environment for the individual and an effective activity based office.

By activating an intelligent module you are free to build the table just as smart as your needs require it to be. For instance, you might use an app on your tablet or smart phone to remind you when it's time to stand up and work for a while. Are you working at an activity based office, an integrated booking system may show you the next available workstation. Your selected desk will then access your stored profile through your laptop, tablet or smart phone and adjust itself according to your specific way of working.

KEEP AN EYE ON YOUR HEALTH
An app in your smart phone or laptop allows your desk to register any level changes and remind you to vary your working position during the day. The app also lets you control the built-in power sockets so you can turn off the lights or the computer screen when you leave, at the push of a button.

FIND AN AVAILABLE SEAT FAST AND EASY
Let an integrated booking system solve your logistics problems and offer a much needed overview of the premises. The system is also a way to efficiently locate your colleagues during the day.

RAISE AND LOWER THE TABLE WITHOUT DISTURBANCE
EFG Active is delivered with exceptionally silent motors to minimize noise levels in the open office. The programmable hand control is fitted on the table allowing you to easily create five different, pre-programmed positions.

PRACTICAL AND NEAT
EFG Active can be ordered with a sliding top that gives you access to the power outlets in conveniently located cable trays underneath the table. Integrated outlets in the table top simplifies your daily needs to charge everything from smart phones to tablets.

BUILD INTEGRITY AND PERSONALITY WITH EFG ADD AND EFG TAB

Handling noise levels in an open office is absolutely vital for peace of mind at work. The sound absorbing EFG Tab desk screen allows you to create a workstation that meets to your individual activities and needs for privacy. The screen aside, you might also want to add a function list to free up some more desk space or a sliding table top to facilitate cable management and open up for more accessible power outlets for charging your smart phone etc.

Don't forget to include EFG Add – our series of smart and practical accessories especially developed to add a personal touch to your workstation. Here is everything you need to work as efficiently and organized as possible. From memo boards and paper holders to mirrors, hangers, shelves and cable trays. Most of the accessories are simply hung across the edge of the screen and may be moved around or brought along to the next workstation without leaving a mark.
